Project Overview

App Name:

Hungry – Fast & Reliable Food Delivery App

Problem Statement:

- Long waiting times for food orders
- Lack of real-time order tracking
- Limited restaurant choices in some areas
- Poor UI/UX in current delivery apps

Our Solution:

- Fast delivery using optimized routing
- Live GPS-based order tracking (like foodpanda)
- Wide selection of restaurants with smart filters
- Smooth, modern UI/UX

Core Features

User Authentication:

- Sign in with Email/Password
- Google Sign-In integration
- Guest browsing option

Restaurant & Food Listing:

- Browse restaurants with filters (cuisine, price, ratings)
- Food details with images and descriptions

Real-Time Order Tracking:

- GPS tracking of delivery person
- Estimated delivery time countdown

Cart & Checkout System:

- Add/remove food items
- Apply promo codes
- Secure payment via Stripe/Razorpay

Order History & Ratings:

- View previous orders
- Rate restaurants and delivery service

Target Users

- Busy professionals
- Families ordering food
- Students on a budget
- Tourists trying local cuisine

Technology Stack

Category	Technology/Tool
Frontend	Flutter (Dart)
Backend	Firebase (Auth, Firestore)
State Mgmt	Provider / Riverpod
Maps	Google Maps API
Payments	Stripe / Razorpay
Design	Figma

Milestone Timeline

Week	Task Description
1 st	Project setup, Firebase integration, Figma UI design
2 nd	Authentication system, restaurant listing
3 rd	Cart, checkout system, payment integration
4 th	Live order tracking, app testing, final submission

UI/UX Design

Figma Prototype:

<https://www.figma.com/design/ilKzbgD9bnMGBGSpboMzXb/Hungry?node-id=0-1&t=qITMKM5WTV2XS1lQ-1>

Key Screens:

- Onboarding Screen – Welcome users
- Home Screen – Restaurant listings, search & filters
- Food Details – Dish info and add to cart
- Checkout – Payment and delivery options
- Order Tracking – Live GPS-based status
